Chapter 1

Introduction

Topics:

- [DiCE Overview](#)
- [Opening DiCE](#)
- [Session Management](#)

Distributor Commission and Empanelment (DiCE) is a software application with a friendly graphical user interface (GUI) that automates the manual activities in the workflow process of a Mutual Fund domain.

The following are its major advantages:

- Avoids manual tasks involved in the workflow process
- Increases Turn Over Time (TAT)
- Simple management of distributor mapping and commission
- Reusable rate structures
- Transparency of workflow activities
- Flexibility to customize user roles and privileges

DiCE Overview

Distributor Commission and Empanelment (DiCE) is a software application with a GUI that enables administrators to monitor and manage the Commission and Empanelment of Distributors on the basis of diverse components such as Asset Class, Scheme, or Plan. DiCE also enables the distributors to create various rate structures such as Base or Tie up rates considering multiple factors of a Mutual Fund Domain.

A mutual fund is an investment fund that is managed professionally to pool money from various investors to purchase securities.

DiCE is designed to setup and manage rate structures at various levels such as Distributor, Folio, and Scheme. The application is firmly established and possess the ability to cater the varied requirements of a Mutual Fund domain. In other words, DiCE is a one-stop solution for distributors and managers. A limited set of features is accessible to a normal user, however, an admin can provide additional features on request.

Opening DiCE

You can open DiCE on any workstation with a compatible web browser installed. DiCE works well with any web browser such as Internet Explorer, Chrome, Mozilla Firefox, and so on. The application supports both HTTP and HTTPS.

Follow the instructions to open DiCE application:

1. Open the Web browser and enter the IP address of the device in the address field, such as: `http://192.168.33.38:8099/` or `https://192.168.33.38:8099/`
2. Press **Enter**.
The DiCE login page displays. Refer to [Logging in to DiCE](#) on page 9.

Session Management

A DiCE session is the connection between the DiCE client and its managed database. When you log in to DiCE application, a session is established and the session ends when you click **Logout**.

A session remains active until one of the following actions happen:

- You exit by clicking **Logout**.
- You close the browser window.
- When the session is inactive for long.

A session automatically ends when there is no information sent to the application for more than five minutes. However, an Admin can customize and manage the session timing according to the security policy of your company. As the application deals with the sensitive finance information of an organization, it can not afford to leave the session alive when there is no activity which provides intense security from fraudsters or cyber attackers.

DiCE does not display a warning message when the session times out. If your session ends due to inactivity, all DiCE windows become invalid and you must restart the application and log in again.

DiCE enables sessions to both secure and non-secure connections. Make sure you do not enter sensitive data on a non-secure connection.

Access rights for your session are determined by your role and can be enhanced by your Admin. You cannot change your role-based permissions unless provided by the Admin.

Authentication

Topics:

- [Logging in to DiCE](#)
- [Change Password](#)
- [Logging off](#)
- [Forgot Password](#)
- [Troubleshooting DiCE Login](#)

The DiCE application allows only the authenticated users to access the application. As a distributor, when you register your name with the Mutual Fund Company, the company provides you with a set of login credentials to access DiCE application.

ATTENTION: Make sure you change your default password at the first instance of your login.

Logging in to DiCE

You can access the application with valid login credentials.

Enter your details in the **Secure Login** pane of the DiCE application:

1. Enter a valid user ID in the **User ID** field.
2. Enter your password in the **Password** field.

Note: Make sure that your password meets the following criteria:

- A minimum of 8 characters.
- Contains at least one upper case character, alphabet, numeral, and a special character.

3. Enter the letters in the **Captcha** field as shown in the adjacent image.

Note: If the captcha image is unclear, click the corresponding refresh  icon to load a new image.

4. Click **Sign In**.
Your DiCE application homepage opens.

Change Password

The following instructions help you to change your password:

1. On your DiCE application homepage, click account settings  dropdown.

2. Click **Change Password**.
Change Password window opens.

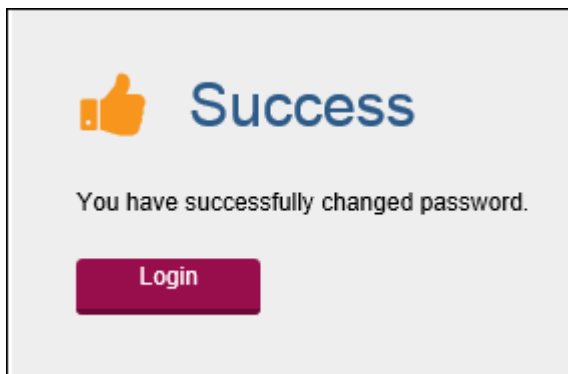

3. Enter your **Old Password**, **New Password**, and **Confirm Password**.

Note: Make sure that your password meets the following criteria:

- A minimum of 8 characters.
- Contains at least one upper case character, alphabet, numeral, and a special character.

4. Click **Update** to change your password.
The **Success** page opens.

Click **Login** to re-login to your account.

Logging off

Click  **Logout** icon on the menu bar to exit the application.

Logged Out page displays.

Click **Login** to re-login to the application.

Forgot Password

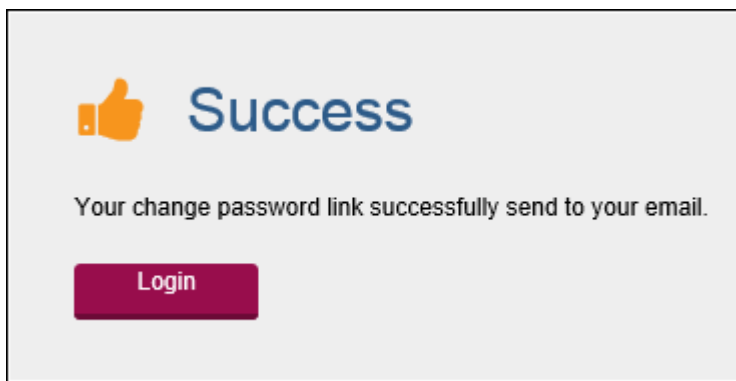

Click **Forgot Your Password?** link next to **Sign In** to reset your password.

1. Enter **User ID** in the corresponding field.
2. Enter **Captcha** as shown in the corresponding image.

Note: If the captcha image is unclear, click the corresponding refresh  icon to load a new image.

3. Click **Reset** to change password or **Cancel** to go to the Login page.
The **Success** page opens.

Click **Login** to re-login to your account.

Troubleshooting DiCE Login

DiCE application restricts you from logging into the interface in the following scenarios:

- **Privacy error / Certificate error:** Web browser displays Privacy error/ Certificate Error when the connection is not secure. It is recommended not to enter sensitive information in a non-secure connection.

Google Chrome browser displays Privacy error as shown in the following figure. Click **ADVANCED**.

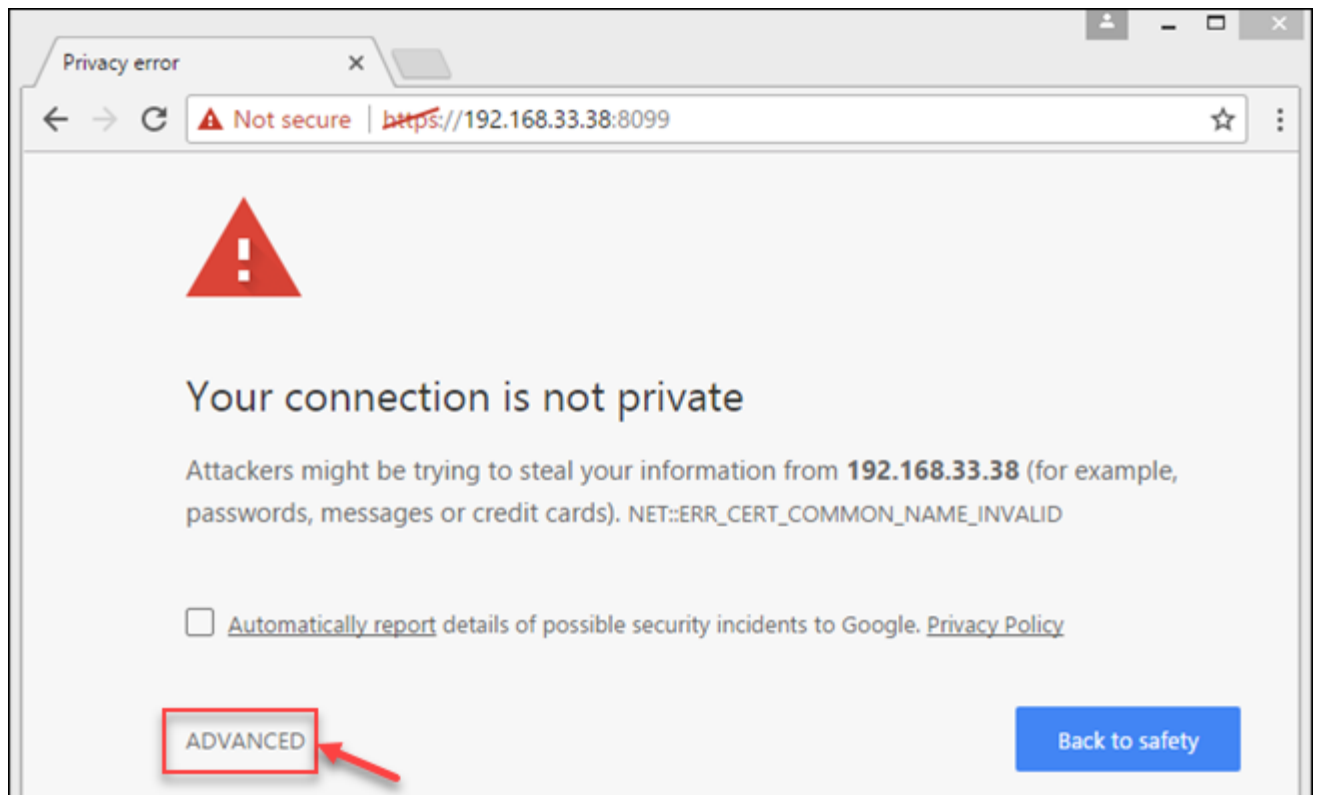

Figure 1: Privacy error-Chrome

Click http address in unsafe mode to login.

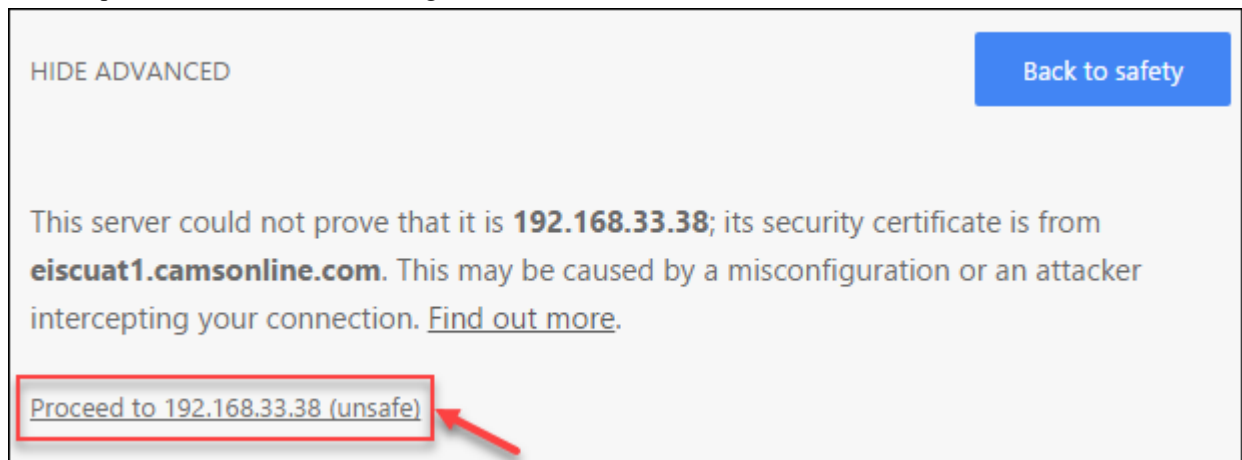

Figure 2: Chrome-Unsafe mode

Internet Explorer browser displays Certificate Error as shown in the following figure. Click the highlighted link in the following figure.

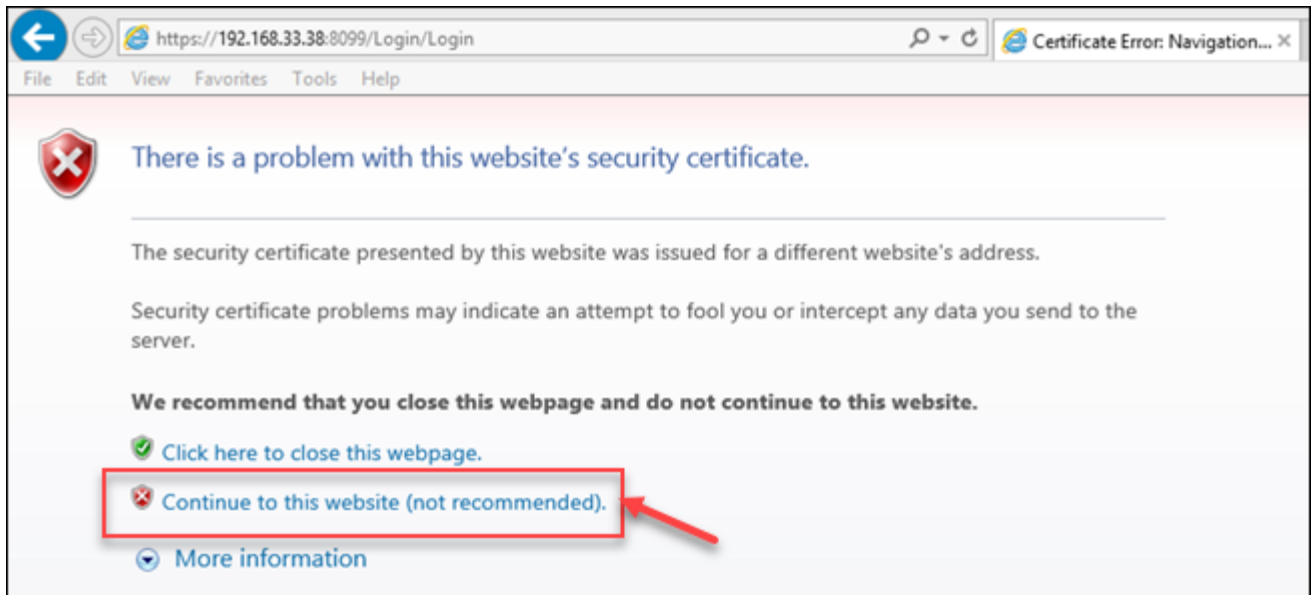

Figure 3: Certificate Error-IE

- **Improper Logout:** When you exit the application by closing the browser window, the session expires but the Session ID is not properly killed. Hence, the following warning is displayed in the browser window.

You can perform any of the following actions:

- Click the first **Click here** link to logout the previous session and login as another user.
- Click the other **Click here** link (as highlighted in the following figure) to close the previous session and continue with your user account.

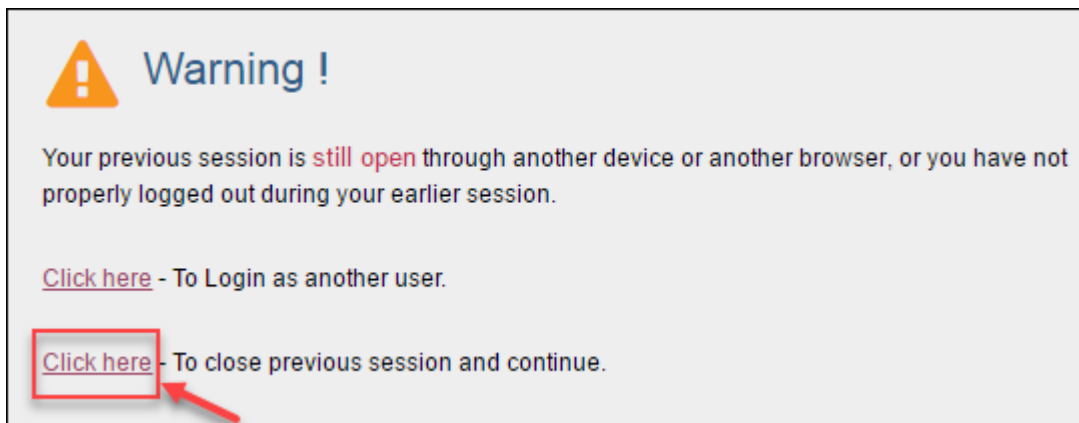

Figure 4: Login Warning

- **Prolonged idle time:** To provide additional security to the data, the session expires when you leave the application inactive for long. The other reasons for displaying the following warning are restricted access to the page or an exception trigger. Click **Re-Login** to go to the **Login** page. Refer to *Logging in to DiCE* on page 9 for more information.

User Guidelines

Topics:

- [DiCE application at a glance](#)
- [Upgrade or Downgrade](#)

This part of the manual deals with the actions of a user who is a Normal, Regional, or Zonal user. The privileges of a normal user are restricted and can be customized only by an admin. Refer to [Administrator Guidelines](#) for more information on Administrator roles and privileges.

DiCE application at a glance

The interface of the application differs for each user. A user can be a normal user or an administrator. The dashboard summary on the homepage is customizable by an admin. The features of DiCE available to you depends on your privileges, however, you can request the admin for additional features.

DiCE Homepage for User

Your DiCE homepage includes few or more of the following components:

- **Logo** : The logo of the stakeholder is displayed on the top left corner of the page.
- **Menu Bar** : The menu bar helps you to access the application using the following icons:
 - Home  icon allows you to go to the login homepage from any other screen.
 - **Empanelment**: Allows you to view existing empanelment, create a quick empanelment and export an empanelment as a spreadsheet.
 - **Rates**: Allows you to setup, view, approve, reject, or review various rates.
 - **Upgrade/Downgrade**: Allows you to view, approve, reject, or review upgrade or downgrade.
- **Region**  : The region icon on the top left corner of the screen below logo displays your registered location.
- **User Details**: The User name at the top right corner of the screen under menu bar displays your name and account information.

You can do the following using settings dropdown:

- **Change Password**: Refer [Change Password](#) for more information.
- **Edit Profile**: You can edit your **User Name**, **Email Id**, **Mobile No** on **Edit Profile** Page and click **Update**.
- An individual graphical representation of the summary of Upgradation / Downgradation, Rate Setups, Incentive Setups, Callback Setups, and so on during the current week.

The status count of upgrade/Downgrade or Rate Setup structures are represented as follows:

- Approved - Blue
- Pending - Yellow
- Review - Purple
- Rejected - Pink

Note: Each status count at the bottom of the graph is a link that displays a detailed **Rate Specification List**.

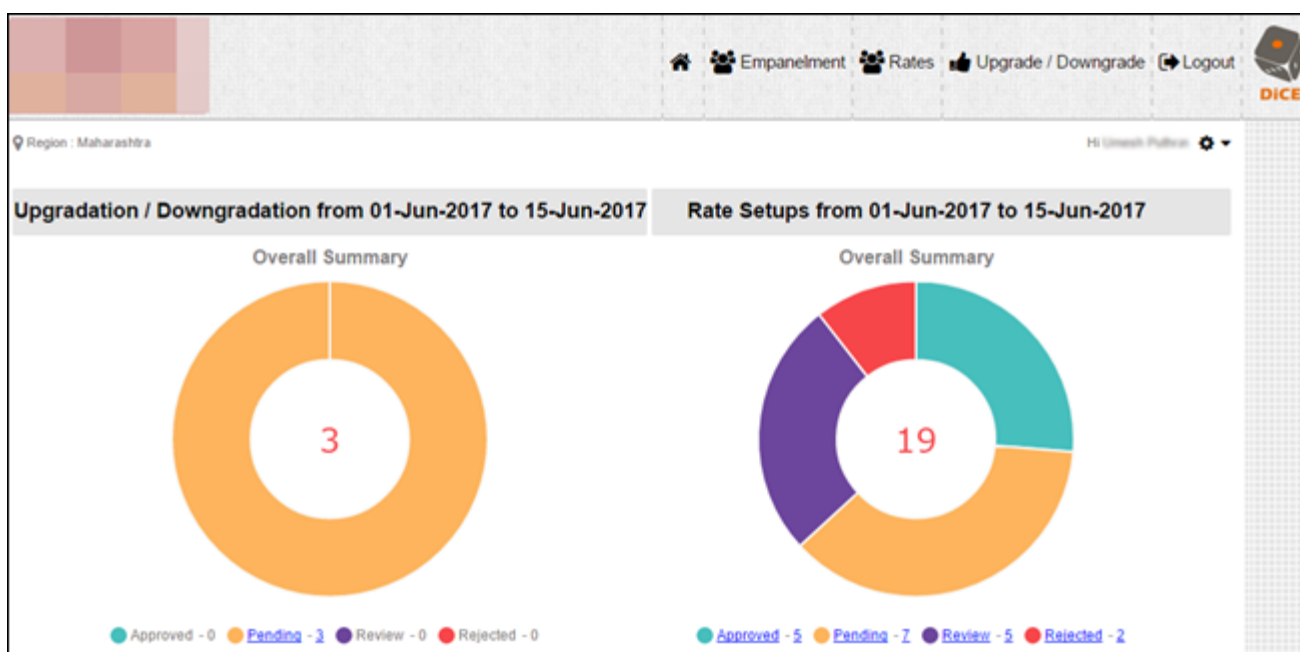

Figure 6: Homepage

Filters on DiCE

The following filters on the application help you to customize your search to list the required information in the table. The usage of filters saves your search time of traversing through the multiple records in a table.

- You can minimize your search list by choosing the number of items displayed as 10, 25, 50, or 100 using **Show entries** filter.
- You can customize your search using **Search By** filter. The application allows you to search the list on the basis of certain parameters relevant to the page. Click **Clear** to undo the filter.
- You can sort the data displayed in ascending or descending order using the up/down arrows of each column header.
- Traverse through the list of users using **Previous**, **Next**, or page numbers.
- Enable **Pending With Me** checkbox (if applicable) to view the list of entries pending for your approval.

Upgrade or Downgrade

You can upgrade or downgrade the distributor category by providing your ARN (AMFI Registration Number). Each new entry undergoes a process of approval. Approvers with appropriate privileges can view, approve, review, or reject the requests. The upgrade or downgrade entries in various stages of the approval cycle are queued in their respective tabs. Requests when rejected cannot be re-submitted. Requests in review state can be modified and submitted for approval. The application has the capability to view the list of approved requests during a particular interval of time with the details of existing and revised Distributor Category.

View Upgrade or Downgrade

You can view the list of upgrades/downgrades (Tie-ups) within your organization that are in various states such as Pending, Review, Approved, and Rejected.

- Click **Upgrade/Downgrade > View**.
Upgradation / Downgradation page opens.
- Click a relevant tab towards the right of the pane such as **Pending**, **Review**, **Approved**, or **Rejected** to view the respective list of entries. By default, **Pending** tab is selected.
- Enter **From Entry Date** and **To Entry Date** using the datepickers and click corresponding **Search** link.

Note: You can use the available [Filters on DiCE](#) on page 16 to customize your search.

Note: You can sort the search list using the up and down arrows with respect to each column header of the table.

The search list consists of the following details:

- **Approve:** Displays the status of the approval process.
- **UD Ticket:** Displays the Upgrade or Downgrade ticket ID.
- **Distributor Code:** Displays the ARN of the distributor.
- **Current Distributor Category:** Displays the name of the present category of the distributor.
- **Revised Distributor Category:** Displays the name of the revised category of the distributor for which you raised the request.
- **Pending With:** Displays the User ID and Name of the approver that the request is pending with.
- **Effective From:** Displays the effective date you chose for the revised category.
- **Creator:** Displays the User ID and Name of the creator that raised the request.
- **Branch:** Displays the branch name of the creator.
- **Zone:** Displays the zone of the creator.
- **Remarks:** Click the expand icon to view the **History of Remarks** popup.
- **Action:** Click pencil icon to take an action on that particular entry. Action works differently depending on your role in the entry:
 - **Creator:** You can view your detailed upgrade/downgrade request.
 - **Approver:** You can **Approve**, **Review**, or **Reject** the request.

Click **Cancel** on the detailed entry page to return to the search list.

Approve/ Reject Upgrade or Downgrade

The following steps help you to approve or reject the Upgrade/Downgrade requests pending for your action:

1. Click **Upgrade/Downgrade > View > Pending** tab.

Note: Enable **Pending With Me** checkbox to view only the list of entries pending for your approval.

The list of entries in pending status opens. The application by default displays only the upgrades/downgrades of the present month, if the system date is greater than 5.

2. Enter **From Entry Date** and **To Entry Date** using the datepickers and click corresponding **Search** link to retrieve data for a particular time period.

Edit Upgradation or Downgradation record

Follow the instructions to update an existing Upgradation/Downgradation record:

1. On **List** tab, click Edit Record icon corresponding to an existing record.

2. On **Edit** tab, you can do any of the following in **Hierarchy Order** table:

- Select a ranking that you wish to include in the workflow from the ranking list and click + icon corresponding to the item to move it to the selected list.
- Select a ranking that you do not want to include in the report from the selected list on the left and click - icon corresponding to the item to move it back to the ranking list.

You can also doubleclick an item to swap.

3. **Optional Level** displays the selected list in the dropdown. Enable the rankings that you want to choose as optional approvers.

The **Optional Level** field displays the number of rankings selected.

4. Click **Update**.

Success message pops up.
