1. Swiggy - Overview

Swiggy is a food delivery application that assists the customers with a user friendly interface to order food online. In the process of online food ordering, a customer can search and choose the restaurant of their choice, select food from the menu items, confirm the order after which the delivery executive of Swiggy picks up from the restaurant, and delivers to the customer at the selected address. The application triggers the status of the delivery at each stage such as delivery person reached the restaurant, picked up your order, and so on, and displays the estimated time of delivery.

1.1 Advantages

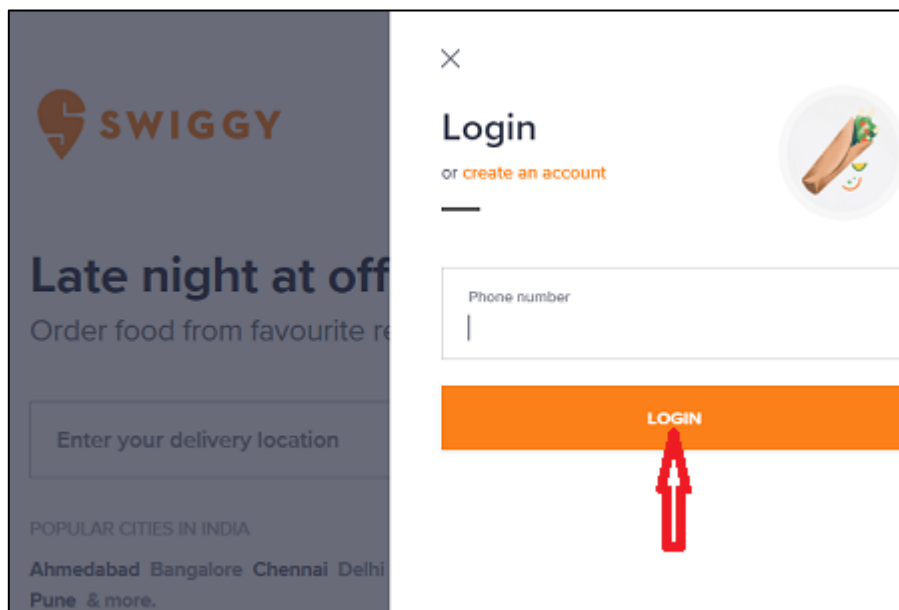

The following are the major advantages of Swiggy:

- Fast delivery
- No minimum order value
- No distance coverage restriction
- Live tracking
- Wallet option for quick payment
- No cancellation before the order is confirmed

1.2 Login to Swiggy

The following steps help you to login to the application:

1. On the landing page of Swiggy, click **Login**.
2. On login page, enter your registered **Phone Number**.
3. Click **Login**.

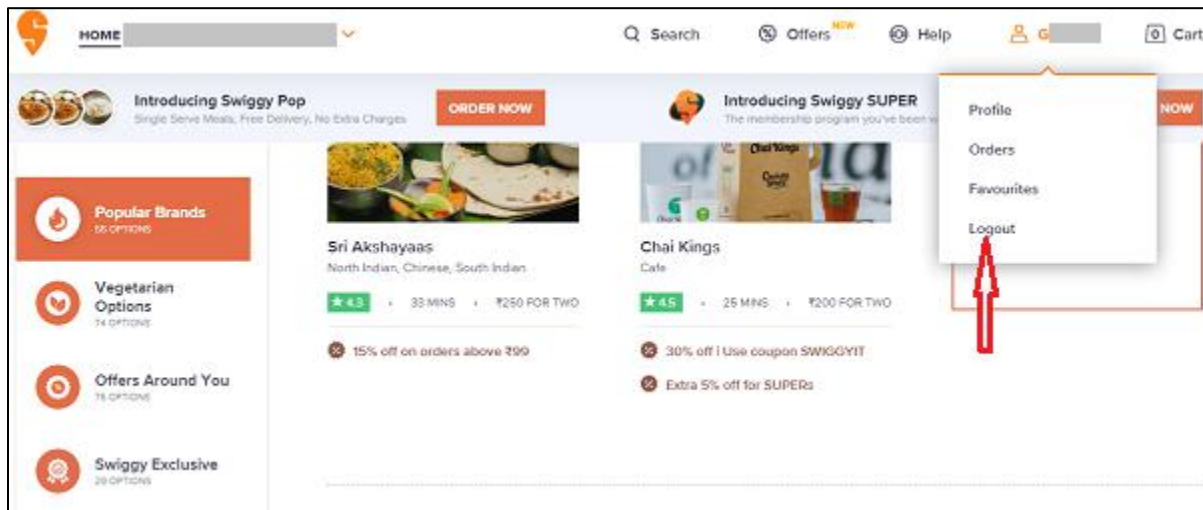

4. Enter the **One Time Password** sent to your phone number.
5. Click Verify OTP.

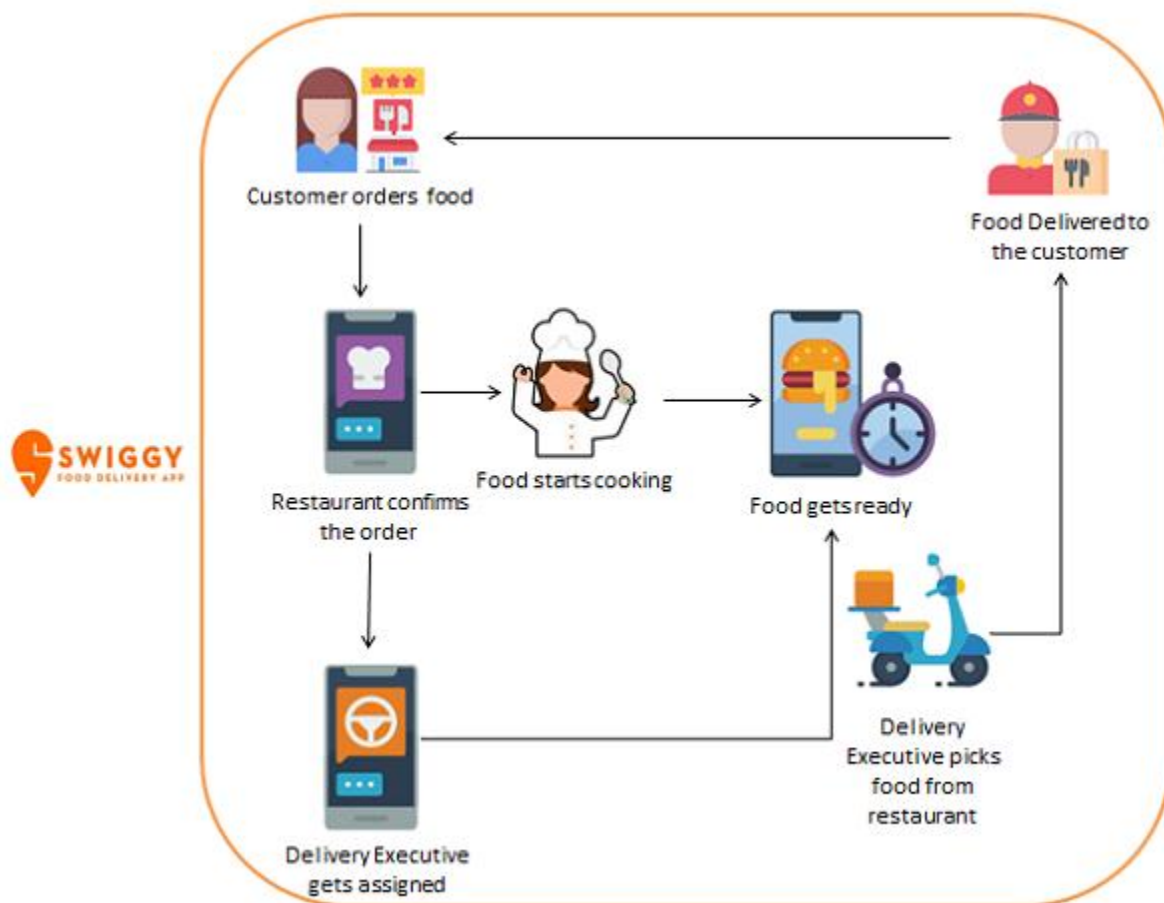

You have successfully logged into the application.

1.3 Logout of Swiggy

Click your account profile on the menubar and click **Logout** from the menu to exit the application.

3. Food Ordering Procedure

The following steps help you to order food on Swiggy application:

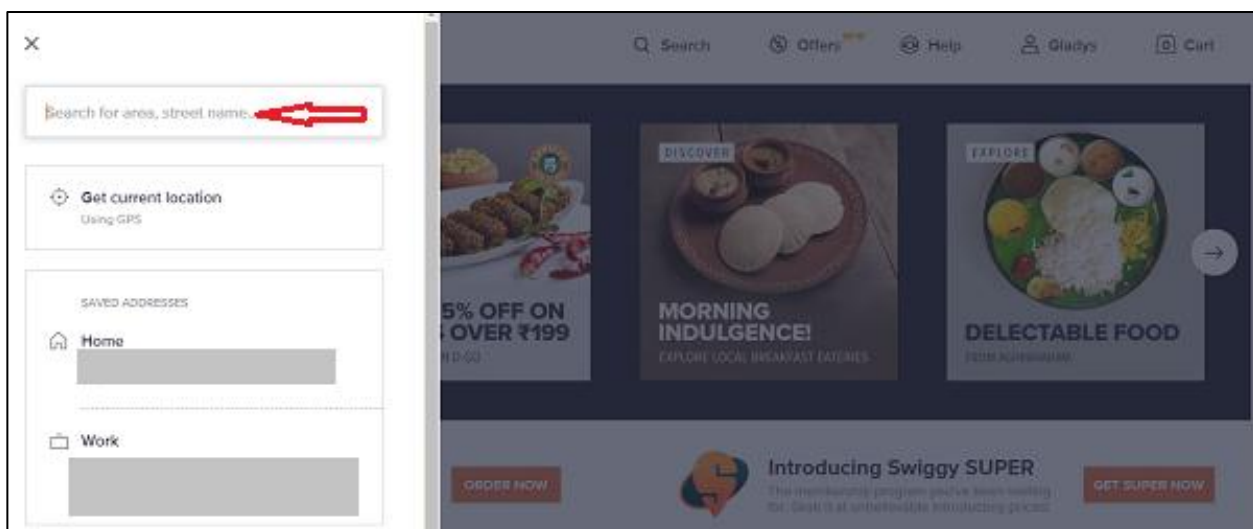

1. Go to <https://www.swiggy.com/> on your web browser.
2. If you are a first time user click **Signup**, else click **Login** to access your registered account. (Refer [Login to Swiggy](#) for more details.)

3. Set your location for delivery by clicking the down arrow as shown in the following figure.

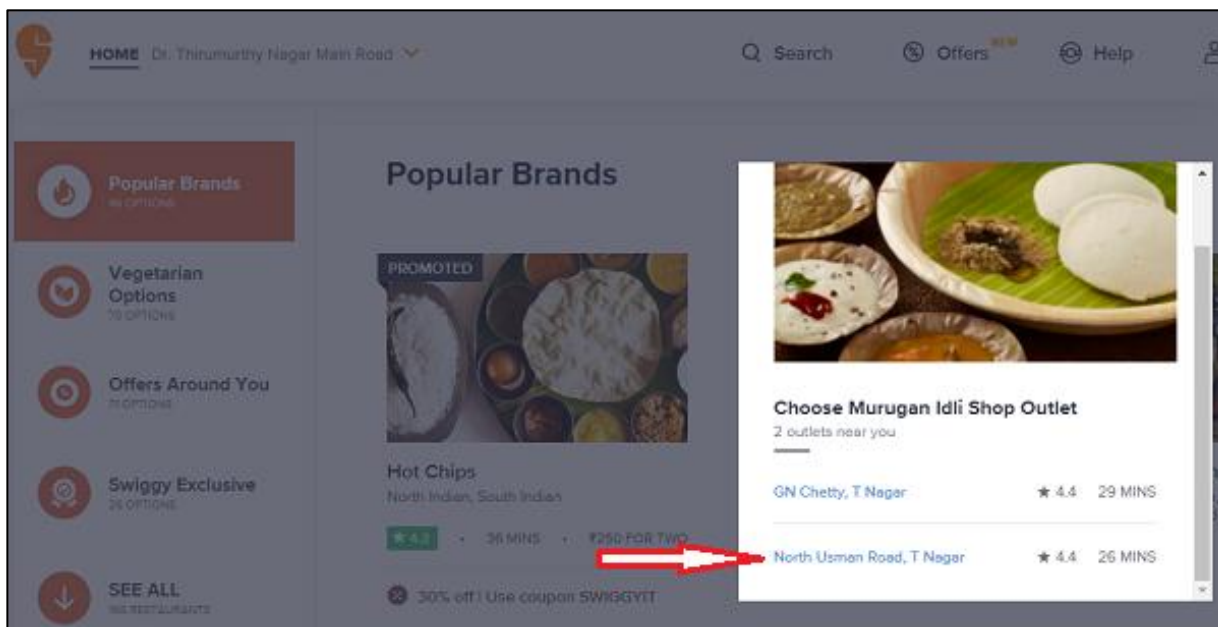

4. Search for an area, Get current location using GPS or click your Saved Addresses for delivery.

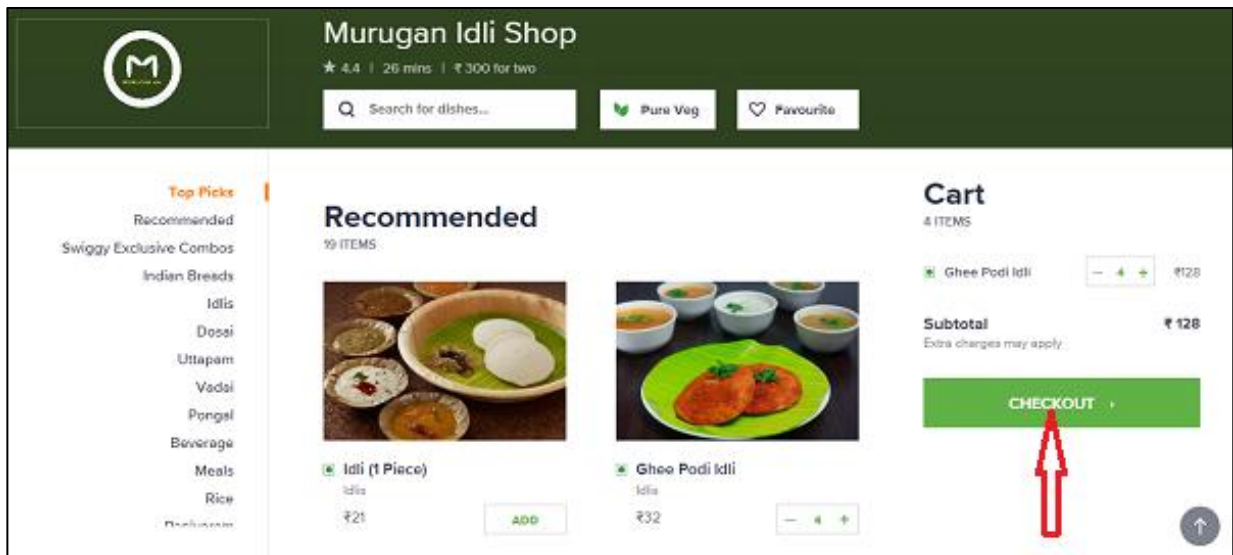

The application displays the list of restaurants near you that are open for delivery.

5. Scan and click a restaurant from the available options.
6. The Choose Outlet popup window opens a list of its respective outlets near you.
7. Check the approximate delivery time and click the outlet of your choice.

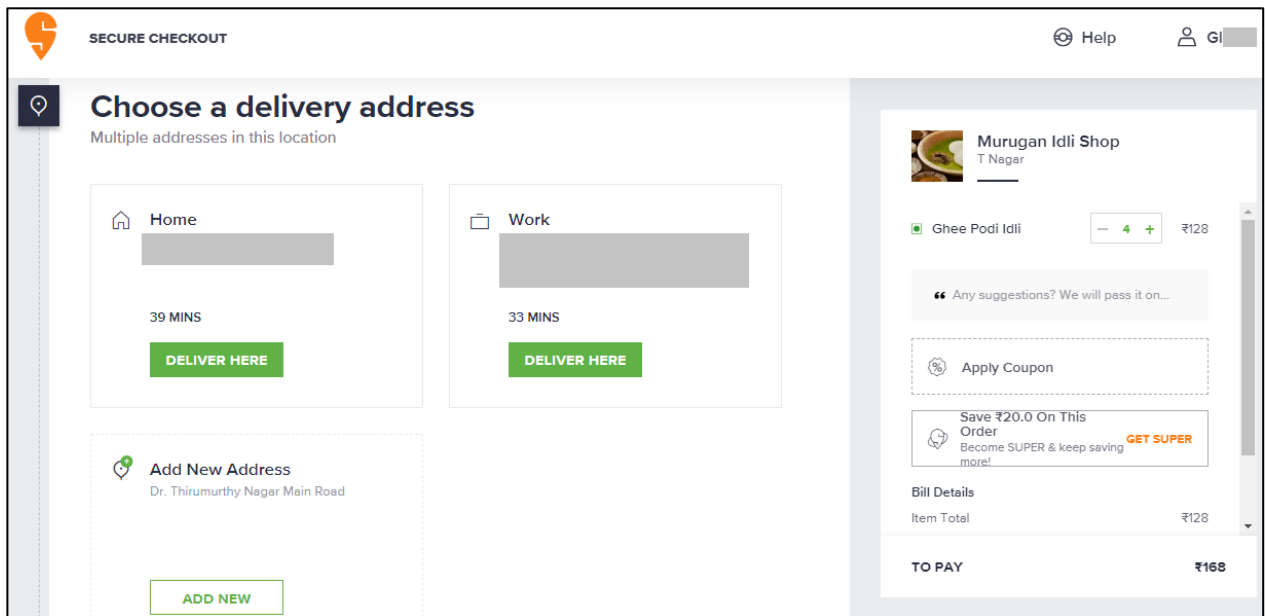

8. Choose your food from the available options on the restaurant menu and click the corresponding **ADD** button, to add items to your shopping cart of Swiggy.
9. On the right of the window, click **CHECKOUT** to confirm your cart items.

NOTE: Be sure to confirm your order as Swiggy might charge a cancellation fee up to full order value to compensate the restaurant and delivery partners if your order is confirmed.

10. Choose a delivery address and click the respective **DELIVER HERE** button to confirm.

11. Choose a payment method and process through the respective payment gateway.

When your payment is successful, Swiggy displays a success message of your order and the allotted delivery executive information.
